A dedicated software developer and graphic designer, with a strong academic background in Mathematics and Artificial Intelligence. Experience in working on a variety of projects in a freelance capacity has strengthened my problem-solving, analytical, and programming skills. Keen to apply my knowledge and technical abilities in a challenging software development role.

SKILLS

- .NET, Python, Java
- Data Science with ML algorithms
- Front End Coding
- Problem-Solving
- Computer Literacy
- Strong Communication
- Deep learning

EXPERIENCE

EDUCATIONAL DEVELOPMENT INTERN

University of Wolverhampton

June 2023 – September 2023 (Expected)

Tasked with designing an educational program to boost GCSE students' success in maths, within a 12-week timeframe. Serving as the lead content and graphic resource developer, effectively combining my software development, graphic design, and mathematical skills to contribute to the project's successful execution.

GRAPHIC DESIGNER AND DEVELOPER

Freelance

July 2022 – Present

Providing a range of design and software development solutions to clients, tailored to their specific needs. Regularly employing various programming languages and leveraging my expertise in graphic design to create and maintain unique digital platforms.

BAR SUPERVISOR

Wolverhampton Racecourse

January 2019 – July 2021

Managed and trained a team of bar staff, consistently ensuring high standards of customer service. Introduced new systems to enhance bar operations' efficiency and accuracy, demonstrating my ability to innovate and problem-solve in a fast-paced environment.

EDUCATION

MSC ARTIFICIAL INTELLIGENCE

University of Wolverhampton

September 2022 – Present

BSC (HONS) MATHEMATICS

University of Wolverhampton

2019 - 2022
